Mochas Drive Thru Coffeehouse, Inc.  
c/o Barbra Carroll, President  
810 N. Spruce Street  
Gunnison, Colorado 81230

Dear Barbra,

Thank you for your informational letter concerning your SF 424.2 "Application for Federal Assistance" grant application on your plans to install a solar thermal system at your proposed building relocation site.

The City of Gunnison is an energy provider and has developed an Energy Action Plan that identifies many strategies to assist in reducing carbon emission by promoting energy conservation. We applaud and support your efforts to assist in this effort with your planned project. As we move forward in implementing further action steps, we are requiring commercial and residential building efficiencies be increased through a new building code adoption, and encouraging retrofits of existing buildings to achieve this goal.

The City of Gunnison hopes to lead by example as we are just now commissioning our Aquatic Center thermal heating system application. Thank you for looking at ways to be a partner in this effort to reduce our 'carbon footprint'.

Sincerely,
